Reasons for choosing SAP

SYSGO needed a proven solution to integrate the processes of its companies and for financial consolidation. At the same time, the solution has to be implemented quickly and it has to be adaptable if business changes are required.

Key benefits

- Consistency of master data in the companies is ensured
- Automatic consolidation of financial transactions
- User queries across company borders allows reporting for the whole group
- Credit management of customers over all companies
- Statutory packages for 4 different countries

Customer quotes

“A system is only as good as the data stored in it - even more when working with several companies. The Intercompany Solution helps us to ensure data consistency of master data across all companies.”
